

Welcome

A **HUGE** thank you for being a part of the Insect Investigators project! We hope you are as excited to participate as we are to have you on board.

To get you ready for your Insect Investigators journey, we have put together lots of resources to help you along the way. Our website is continually being updated with lots of useful tips and tricks, as well as all of the information you need to be involved in the project:

<http://insectinvestigators.com.au/>

On the website you'll also find some awesome videos which will get you started and ensure that everything is managed correctly

<http://insectinvestigators.com.au/resources/>

You've been sent a huge amount of stuff which may be a little daunting at the start, but rest assured it's all very straightforward. Included in this exciting delivery is 1) information about the items in your kit. 2) instructions on how to set up and look after your Malaise trap and 3) bottle return instructions. If you think something is missing or need some more info on any of the items then please get in touch either through the website <http://insectinvestigators.com.au/contact-us/> or send general enquiries to Erinn at erinn.fagan-jeffries@adelaide.edu.au, QLD school enquiries to Andy at ahowe@usc.edu.au, WA school enquiries to Karen at admin@wagouldleague.com.au and SA school enquiries to Alice at Alice.Woodward@sa.gov.au or Syliva at Sylvia.Clarke@sa.gov.au

We've tried to make it as straightforward as possible, but if anything doesn't make sense then please don't hesitate to ask questions!

We really hope you enjoy being a part of this incredible project, by being involved you are making a direct, and extremely important contribution to science and to discovering and documenting Australia's biodiversity, so THANK YOU!!
